  Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            DB

potassium channel KV1.3 - rat
N;Alternate names: potassium channel Kv3; potassium channel R
C;Species: Rattus norvegicus (Norway rat)
C;Date: 28-Oct-1992 #sequence revision 28-Oct-1992 #text\_chan
C;Accession: A43531; JH0168; S06708
R;Douglass, J.; Osborne, P.B.; Cai, Y.C.; Wilkinson, M.; Chri
J. Immunol. 144, 4841-4850, 1990
A;Title: Characterization and functional expression of a rat of A;Reference number: A43531; MUID:90278098; PMID:2351830 M.; Christie, \_change RCKG; genomic DNA clone encoding 09-Jul-2004 potassium M.J.; Adelman, channel RGK5

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   -
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          SUBCELLULAR LOCATION: Integral membrane protein.
ALTERNATIVE PRODUCTS:
Event=Alternative splicing; Named isoforms=2;
Name=1; Synonyms=KCND3L, Long;
IsoId=Q9UK17-1; Sequence=Displayed;
Name=2; Synonyms=KCND3S, Short;
IsoId=Q9UK17-2; Sequence=VSP_008826;
TISSUE SPECIFICITY: Highly expressed in heart and brain, in particular in cortex, cerebellum, amygdala and caudate nucleus.
Detected at lower levels in liver, skeletal muscle, kidney and pancreas. Isoform 1 predominates in most tissues. Isoform 1 and isoform 2 are detected at similar levels in brain, skeletal muscle
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         s SWISS-PROT entry is copyright. DOMAIN: The segment S4 is probably the voltage-sensor a characterized by a series of positively charged amino a every third position.

SIMILARITY: Belongs to the potassium channel family. D
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            regulatory subunits.
SUBUNIT: Homotetramer or heterotetramer with KCND1 and/or KCND2.
SUBUNIT: Homotetramer or heterotetramer with KCND1 and/or KCND2.
KCNIP4 (By similarity). Interacts with KCNE1, KCNE2, SCN1B and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                FUNCTION: Pore-forming (alpha) subunit of voltage-gated rapidly inactivating A-type potassium channels. May contribute to I(To) current in heart and I(Sa) current in neurons. Channel properties are modulated by interactions with other alpha subunits and with

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    IsoId=Q62897-3; Sequence=VSP_008831, VSP_008832; TISSUE SPECIFICITY: Highly expressed in brain, in particular the retrosplenial cortex, medial habenula, anterior thalamus, hippocampus, cerebellum and lateral geniculate and superior colliculus. Highly expressed in heart atrium and throughout the ventricle wall, in lung and vas deferens.

DOMAIN: The segment S4 is probably the voltage-sensor and is characterized by a series of positively charged amino acids a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          similarity).

(Lond.) 542:369-382(2002).

FUNCTION: Pore-forming (alpha) subunit of voltage-gated rapidly inactivating A-type potassium channels. May contribute to I(To) current in heart and I(Sa) current in neurons. Channel properties are modulated by interactions with other alpha subunits and with
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     every third position.
SIMILARITY: Belongs to the potassium channel family. D (Shal)

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 DPP6, DLG4 or FREQ may increase cell surface expression. TISSUE SPECIFICITY: Highly expressed in heart and througout the brain, with similar levels in cortex and hypothalamus, and muchigher levels in hippocampus, dentate gyrus and the habenular nucleus of the thalamus. Detected at similar levels in heart
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         SUBUNIT: Homotetramer or heterotetramer was associates with the regulatory subunits with FLNA and FLNC (By with DPP6, DLG4 and FREQ. SUBCELLULAR LOCATION: Integral membrane is subcellular to carrior.
                                                                                                                                                                                                                                                                                                                                                                                                                                       Subfamily. SUBUNIT: Homotetramer or heterotetramer with KCND1 and/or KCND3. Associates with the regulatory subunits KCNIP1, KCNIP2, KCNIP3 a KCNIP4. Interacts with DPP6, DLG4 and FREQ (By similarity). Interacts with FLNA and FFLNC.

SUBCELLULAR LOCATION: Integral membrane protein. Detected in dendrites in cultured hippocampal neurons.

TISSUE SPECIFICITY: Highly expressed throughout the brain. Expression is very low or absent in other tissues.

DOMAIN: The segment S4 is probably the voltage-sensor and is characterized by a series of positively charged amino acids at
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  PTM:

May contribute to current in the heart and I(Sa) current in neurons. Channel properties are modulated by subunit assembly. SUBUNIT: Homotetramer or heterotetramer with KCND2 and/or Associates with the regulatory subunits KCNIP1, KCNIP2, KCKNIP4 (By similarity).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              every third position.
SIMILARITY: Belongs to the potassium channel family. D (Shal)
